

## TECHSOFT PVT LTD.

---

## My Demo Story

- I have already worked on UI screen designing using bootstrap. Mostly it will be design change in CSS stylesheet. That's why i know a little bit about how to create and rearrange the bootstrap designing page.
- So I had some ideas on web page development. Tam also guided me with some development ideas.
- At that time I was working from home for another company. I had hectic schedules so I got very less time to prepare for this development.
- In this short span I came up with idea that I need to show maximum number of functionalities or the requirements of HTML, CSS, Javascript demo in single package.
- Tam also advised me that is very easy for you to create an IT company as I have already experience in IT. This is how this website became an winning website for IT based.

# Main Functionalities

## Overall Screens

User Interface	Technical
<b>Tabs:</b> Home <ul style="list-style-type: none"> <li>• Services</li> <li>• About Us</li> <li>• Contact Us</li> </ul>	<ul style="list-style-type: none"> <li>• I have divided this single home screen into 3 sections with different Id for each section.</li> </ul>
	<ul style="list-style-type: none"> <li>• If I click on these 3 headers, using this Id that the starting position will come up the top of our screen.</li> </ul>
<b>Buttons:</b> There are 2 button clicks on this home screen. Register <ul style="list-style-type: none"> <li>• It contains basic details for our client to register our portal.</li> </ul>	<ul style="list-style-type: none"> <li>• If we click on these two buttons, it will switch to another screen.</li> </ul>
	<ul style="list-style-type: none"> <li>• I have handled some basic validations on this register screen. After entering all the values in it, clicking on the submit button will open the print screen.</li> </ul>
About Us – Read More... <ul style="list-style-type: none"> <li>• This screen explains about the companies growth and position of the company in the market and also the clients.</li> </ul>	

## Home Screen

- In the name of the website I have used two different colors using the span.
- Divided the content of using H1 tag into three child element and used the animation for delay attributes to delay the 1<sup>st</sup> line by 1sec, the 2<sup>nd</sup> line by 2sec and the 3<sup>rd</sup> line by 3sec.
- On this Register button, I changed the background color of the button using the mouse hover attribute.

## Actions of the Registration Screen

REGISTRATION FORM

First Name :

Last name :

Gender : ☒ Male ☐ Female ☐ Other

Phone Number :

Email :

Password :

Confirm Password :

Address :

- Made all fields in the screen as mandatory.
- Restricted to type text in phone number field.
- Manipulated the Email format validation in the Email field. The validation error will be displayed if the value is given without the email format.
- The length is set in the password field. If it is less than 8 characters an error message will be displayed.(Error MsgText: Password length must be at least 8 characters)
- This confirm password field is used to verify that they give the same value as we gave in the password field. If these two have different values, it will show us the password mismatch error.
- If we submit all the fields after giving the value correctly then the print screen will be open after displaying the success log message. We can save it as a pdf for our own purpose.

## Services by the Company

The screenshot shows the 'Services' page of the TechSoft Pvt Ltd website. The page has a blue header with the company name 'TECHSOFTPVT LTD' on the left and navigation links 'HOME', 'SERVICES', 'ABOUT US', and 'CONTACT US' on the right. The main heading is 'SERVICES' in large, bold, black letters. Below the heading, a paragraph describes software development services as a complicated process to design an application or software to meet a particular business or personal objective, goal or process. It lists the stages: Planning, Analysis, Product Design, Development & Implementation, Testing, and Maintenance. Below this, there are four service cards, each with a gear icon and a title: 'WEB APPLICATION DEVELOPMENT', 'IOS APP DEVELOPMENT', 'ANDROID APP DEVELOPMENT', and 'SEARCH ENGINE OPTIMIZATION SERVICE'. Each card contains a brief description of the service.
